M-SUNAGREEN®

An innovation in seed dressing!

M-Sunagreen is an auxiliary plant preparation used as a plant growth stimulator with a formulation suitable for use as part of a seed-dressing liquid. Application on seeds results in an increased volume of the root system (better nourished and more vigorous crop) and more uniform and faster emergence.

Chemical and physical properties

Composition	g/l
2-aminobenzoic acid (g/l)	5.0 ± 0.5
2-hydroxybenzoic acid (g/l)	2.5 ± 0.5
pH value	5.0–7.0

Content of risk elements

Meets the statutory limits (mg/kg of product): Cd ≤ 1.0; Pb ≤ 10.0; Hg ≤ 1.0; As ≤ 10.0; Cr ≤ 50.0. Relatively harmless to bees and fish.

Scope and method of use

M-Sunagreen may be applied to the seed surface diluted with water or added to the registered seed-dressing agent used, at the dose listed under "Registered applications and dosage".

Preparation of the seed-dressing liquid

Method in case of combining **M-Sunagreen** with a registered seed-dressing agent:
- the preparation is carried out according to the instructions for use of the chosen seed-dressing agent
- the volume of **M-Sunagreen** added replaces an identical volume of water
- the seed-dressing liquid must be used within 24 hours of its preparation.
Method in case only **M-Sunagreen** (diluted with water) is used:
- the mixing tank is filled with a volume of water (according to the technology used) that is approximately indicated in the section "Registered applications and dosage"
- stirring constantly, add the amount of **M-Sunagreen** specified under "Registered applications and dosage"
- the seed-dressing liquid must be used within 24 hours of its preparation.
Technology of application:
Seed treatment with **M-Sunagreen** is carried out in approved continuous and discontinuous (batch-type) seed treaters that ensure accurate and even dosage and coating of the seed surface with the seed-dressing liquid.

First aid

Upon ingestion, drink 0.5 l of lukewarm water with 10 tablets of activated charcoal. Upon contact with eyes, rinse with a stream of lukewarm water for 15 minutes. Upon contact with skin, remove contaminated clothing and wash the skin with soap and water. In all cases of damage to health, medical treatment must be provided to the affected individual.

Disposal of residues

Residues of the seed-dressing liquid and rinse water must not enter into the sources and receiving bodies of surface water. Residues in the container are to be disposed of by rinsing with water, which will then be used to prepare a new "seed-dressing liquid". Recycle the empty containers.

Net volume

10 l

Marketing authorisation number
3431

Use only in case of real need!
Do not exceed the recommended dosage!

Registered applications and dosage

Crop	Time of application	Dose per 1000 kg of seed [l/t]	
		M-Sunagreen	water
winter cereals	- seed treatment	1.5	8.0
spring barley	- seed treatment	1.5	8.0
opium poppy	- seed treatment	30.0	20.0
maize	- seed treatment	1.5	9.0
oilseed rape	- seed treatment	15.0	10.0

Instructions for occupational safety and health

S 2 Keep out of the reach of children. S 7 Keep container tightly closed. S 13 Keep away from food, drink and animal feedingstuffs. S 24/25 Avoid contact with skin and eyes. S 26 In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. S 36/37/39 Wear suitable protective clothing, gloves and eye/face protection.

Follow the instructions for use to avoid risks to individuals and the environment.

Storage conditions

M-Sunagreen is to be stored in original well-sealed containers in dry warehouses at a temperature of +5 to +30 °C. Protect from children, untrained persons, direct sunlight and radiant heat.

Shelf life

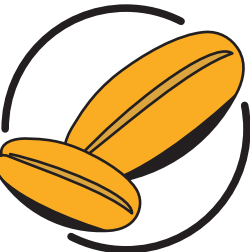

24 months from the date of production.
